

Course Evaluation – “Working Together” London, June 2007

What was the most useful bits of this workshop for you?

Understanding the difference between operational and strategic; using frameworks/structure for strategy. I'm grappling with this right at the moment so this is useful.

Tools for teams was incredibly helpful and I will use with my team

Looking at strategy and working on the process of developing a high level strategy

Good mix of theory and high level implementation

Reason for the team - helps answer team's questions re too many meetings

Excellent, thank you!

Tools around meetings and agendas

Tools for strategy writing

Strategy preparation

Very well presented and good to have a mixed group

I think from the working together strategically and understanding the beginning bit of strategy better

The process of the championship teams. I will use this with my team instead of std team building / devt.

Writing team goals / purpose

Decision making checklist

Tools to take away and apply to teams to help manage agendas

How can this event be improved?

I really enjoyed this masterclass, for once it was completely relevant and useful to my role - thanks (I've attended other external events which haven't helped)

Room with windows

Opportunity to purchase the Championship Teams handbooks

Some slides too busy / small on the printout

Some of the writing on the handouts a bit small

Chairs not comfortable

Perhaps writing a short strategy as a task?

I think I would like more concrete examples and case studies

Some early slides a bit hard to read as colour on blue background.
